HOW STRONG IS YOUR CYBERSECURITY CULTURE?

Experts stress the importance of fostering a robust cybersecurity culture to counter insider risks within organizations like yours. But how can you accomplish this and where do you even start?

Use our checklist to determine how strong your security culture is and where you could strengthen it.

ARE YOU ON THE RIGHT TRACK?

- [ ] We empower our employees with regular security risk training.
- [ ] We foster an environment where individuals aren't afraid of losing their job due to honest mistakes.
- [ ] We enforce strict bring your own device (BYOD) policies to maintain a secure working environment.
- [ ] Passwords are securely stored and protected with multifactor authentication.
- [ ] Everyone in our company knows the tell-tale signs of a phishing email and knows how to respond.
- [ ] We emphasize the importance of unique credentials, ensuring they aren't reused, recycled or shared.
- [ ] Sticky notes or electronic documents with passwords are not found anywhere.
- [ ] Employees are encouraged to seek help or clarification on security issues and procedures.
- [ ] Our approach to security awareness training is rooted in education and empowerment rather than punishment.
- [ ] We proactively monitor the dark web for compromised employee credentials, minimizing security risks.
- [ ] We emphasize the significance of practicing smart security behaviors, with each employee serving as a role model.
- [ ] Security is a clear corporate priority, with dedicated resources and support to ensure its effectiveness.
