Cyber Incident Cost Snapshot

Answer a few quick questions to estimate what a cyber incident could cost your business.

Estimated time: Under 60 seconds |

HOW TO VIEW YOUR RESULTS
Select your answers on Page 1, then review your Estimated Risk Exposure below.

Here's your Cyber Incident Cost Snapshot based on the calculator you completed.

What a Cyber Incident Could Cost Your Business

Estimated Financial Impact

-- Select options on Page 1 --

Exposure Level -

Most businesses don't estimate this number until they are already in the middle of an incident.

RISK SCALE:

LOW	MODERATE	HIGH	CRITICAL
$25k - $50k	$50k - $100k	$100k - $180k	$180k - $300k

This estimate is based on initial inputs and standard business impact assumptions.

What's Not Included in This Estimate

These are often the largest costs during a cyber incident.

- Legal and compliance
- Customer loss
- Vendor costs
- Insurance gaps

Your full risk breakdown is not included in this report.

Next Step

This snapshot only shows part of the picture.
A full review identifies what is increasing your exposure and where it can be reduced quickly.

- What's increasing your exposure
- Where your business is most vulnerable
- How to reduce risk quickly
