

CELERA NETWORKS

Making **Technology** Work For You

How Celera Networks Turned a Complex Migration into a Simple, Successful Process

Case Study

Organization & Location: Boston Realty Advisors | Boston, MA
Industry: Real Estate
Services Offered: Real Estate and Consulting

“Celera shepherded us through our entire migration process, ensuring we never faced any downtime.”

Wil Catlin, Managing Partner at Boston Realty Advisors

Customized Cloud Solutions for a More Efficient Business

Challenge

Boston Realty Advisors faced a monumental task: taking their server farm and facilitating a transition into the cloud for their new location. The organization was concerned they would face hefty downtime and open their system up to cybersecurity risks during the process. They needed a custom cloud solution that allowed them to do away with their server infrastructure without compromising their business.

Solution

The Celera Network team implemented a transition of Boston Realty Advisors' servers to the Microsoft Azure Cloud. Celera began with personalized pre-migration planning and support before transferring all necessary systems to Azure. Moreover, they provided expert recommendations on Azure applications, custom configuration creation assistance and 24/7/365 technical support. As a result, Boston Realty Advisors was able to keep up and running without redundancies.

Results

Today, Boston Realty Advisors has seen great improvements in their daily operations, allowing them to achieve their business initiatives without worrying about technological disruptions.

Through its partnership with Celera Networks, Boston Realty Advisors has experienced the following improvements:

Continuous Uptime:

Both during and after the migration, systems continue to run seamlessly, ensuring optimal company efficiency.

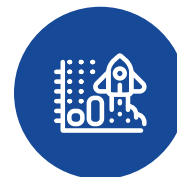

Satisfied End-Users:

Users benefit from swift accessibility to files and folders and much smoother communication.

Strong Cybersecurity Protection:

Potential cyber threats and security vulnerabilities are quickly identified using Microsoft Azure's real-time cybersecurity intelligence.

Accelerated Business Growth:

The business has seen an acceleration in company growth, easily able to onboard new individuals to its system.

Celera Networks: Strategic Cloud Consulting and Management

Celera Networks' managed service professionals are experts in providing calculated cloud computing and migration strategies. Alongside cloud services, Celera Networks also provides solutions for cybersecurity, IT compliance and managed IT support.

Celera Networks Excels in:

- **Exceptional customer service**
- **Advanced, comprehensive technology**
- **Results-focused IT support**
- **Multi-layered security solutions**
- **Dedication to client growth**

"Celera has the unique ability to forecast technological problems and address them before they become an issue."

Wil Catlin, Managing Partner at Boston Realty Advisors
